Creating an Automatic Table of Contents in Microsoft Word

1. Apply Heading Styles

1. Type the headings and subheadings in your document.
2. Select (highlight) the main headings, such as Chapter 1, Chapter 2, or other major sections.
3. On the **Home** tab, click **Heading 1**.
4. Select the subheadings and click **Heading 2**.
5. For lower-level subheadings, use **Heading 3** as needed.

Note: Applying the correct Heading styles is essential because Microsoft Word uses these styles to generate an automatic Table of Contents.

2. Create an Automatic Table of Contents

1. Place the cursor where you want the Table of Contents to appear.
2. Go to the **References** tab.
3. Click **Table of Contents**.
4. Select the desired automatic Table of Contents format, such as:
 - Automatic Table 1
 - Automatic Table 2

Once selected, Word will automatically generate the Table of Contents, including headings and corresponding page numbers.

3. Update the Table of Contents

When the document content or page numbers change, you can update the Table of Contents as follows:

1. Click anywhere inside the Table of Contents.
2. Click **Update Table**.
3. Choose one of the following options:
 - **Update page numbers only:** Updates only the page numbers.
 - **Update entire table:** Updates both the headings and page numbers.
4. Click **OK**.

The Table of Contents will be updated to reflect the latest changes in the document.
