

Exchange program and internship at Monozukuri University.

Start up from April to July, 2017

Ms. Thitirat Jangchumrus (Oom) Production Engineering

Topic

1. Exchange program
2. Internship
3. Living
4. Why I want you join this program

Exchange program

Period of this exchange program start up from April to May. The weather was cold but the sun was very bright. They gave me choose to study the subjects of interest. It first time that studied engineer subjects in Japanese. For example Robot, Machine tool, Universal design and Automotive. At Monozukuri University they have club for take care student who exchange. We did activities together

for example party, cooking, taught Thai language and culture, sport and game, travel and visit Japanese house.

Furthermore there is Thai teacher that kindness. He taught Japanese language and culture. He always helped and gave consult when I had problems or sick. I did many activities but main activity is practice Japanese skill

Internship

Period of internship start up from June to July. That time its rainy season but almost sunny day. My place for internship is Aicohsha. There is in Saitama but distance between dormitory to company used time about 2 hours by walk, bicycle and train. It was very far and used much money. But I was happy because Aicohsha gave me wonderful experience.

Aicohsha is Food Industry. This company produce machine for make desserts for example Mixer, Automation cut machine, etc.

For 2 weeks, they gave me studied Auto CAD program and method checking machine.

Then they gave me works that were think “Tool for check tension of mixer’s belt” and “Jig for fix that tool with mixer” this works were quite difficult because many condition. I was having fun and challenging with it. My mentor had his job. He could not help me every time so I had to try and did it by myself for example think method for check tension and jig for fix, drawing by Auto CAD program, choose and order parts for did tool and jig, make jig , coding and assembly it. When I did it by myself, I very proud in my work. However he was good mentor. He always gave consult to me especially safety.

Other more I met Thai brother that work there. He was kindness and friendly. We always traveled and have wonderful time together.

Living

For a period of 4 months I stayed at dormitory of Monozukuri University. It far away from University about walk in 5 minutes. It is separate men and women. There is toilet in your room. There is kitchen room, laundry room and living room. In living room has internet Wi-Fi. If you are bored, you can play table tennis in living room. Nearby there is a convenience store and train station.

At Monozukuri University, there have many class rooms, library, workshop, gym and canteen. I studied and did activities here.

Why I want you join this program

I think this program made me grow up and gave wonderful experience. I have new friends and new connection. It was like dream. I never forget that moment. If you want challenge yourself and want to adventure, this is an opportunity.
